To Our Market Garden Friends:

We do not compete with and are not dealing in cheap, poorly grown Stocks, but aim to supply only Seeds of known purity, produced by careful selection and painstaking care from pedigreed Seed Stock, believing that our seeds are our best advertisement.

This list Cancels All Previous Offers.

DAYS: In listing the number of days from planting to marketable condition, we have used the average results secured over a period of years. These figures apply to plantings under normal conditions, and will vary somewhat in different sections of the country, but the number of days indicated will serve to show the relative maturity of the different varieties.

All goods in this Catalogue are offered subject to being unsold on receipt of order and the prices are subject to change without notice.

TERMS:

Bills rendered to regular customers or parties of approved credit from January 1st up to June 1st are due on July 1st. After June 1st all goods are sold on thirty day basis.

When cash accompanies order, 5% discount may be deducted from catalogue prices on seeds only.

DISCLAIMER

TETHER SEED COMPANY, INC. gives no warranty, express or implied, as to the productiveness of any seeds or bulbs it sells and will not be in any way responsible for the crop. Our liability, in all instances, is limited to the purchase price of the seed.

POLE, OR RUNNING BEANS

1 lb. 10 lbs. 60 lbs.

Kentucky Wonder or Old Homestead \$.90 \$5.75 \$26.75

The most popular, green podded climbing variety, early and productive. Pods 8 to 9 inches long, nearly round, slender, decidedly curved, tender and good quality. 65 days.

LIMA BEANS

DWARF OR BUSH VARIETIES

1lb. will plant 100 ft. row; 3/4 bus, 45 lbs, per acre.

I bus. 1 lb. 10 lbs. 60 lbs. Burpee's Improved Bush \$5.50 \$24.25 \$.90 Plant large, vigorous and productive. Pods in clusters of 5 or 6, averaging 4 beans each. Seeds large, plump, flat-oval, white with greenish tinge. 75 days. Fordhook Bush 242 5.50 24.75 .90 Plant large and productive. Pods slightly curved, containing 3 to 4 large thick-oval, light green beans. Yields well under high temperature conditions. 75 days.

POLE VARIETIES

1 lb. will plant 100 hills; 1/2 bus. 30 lbs. per acre.

I bus. 1 lb. 10 lbs. 60 lbs. \$6.00 \$29.00 Dreer's Improved or Challenger \$1.00 Plants very vigorous, hardy, late and productive. Pods about 31/2 inches long, containing 4 to 5 very thick, medium-sized, light green beans of excellent quality. Also known as Potato Lima. 92 days. Early Leviathan 1.00 6.0029.00A very early large podded variety. Pods 5 to 6 inches long, containing 5 to 6 large, flat, white beans, 90 days. Giant Podded 29.00 1.00 6.00 The largest podded Lima in cultivation; extremely vigorous in growth with dark green foliage and pods; midseason. Pods about 7 inches long, 11/2 inches broad and are borne in clusters of 6 to 8; beans extra large and of excellent quality. 90 days.

BEETS

TABLE VARIETIES

1 oz. will plant 50 ft. row; 6 to 8 lbs. per acre.

 $\frac{1}{4}$ lb. 1 lb. 10 lbs. 1 oz. Detroit Dark Red\$.15 \$.40 \$1.25 \$10.00 The best late all around beet. Tops are large. Roots are globe shape, very smooth and small tap root. Skin dark red.flesh intense deep red without zones. Very tender and sweet. 60 days. Short Top Detroit .15 .40 10.00 A strain similar to Detroit Dark Red, but with distinctly shorter tops, roots extremely uniform and more spherical. Color deep blood red. An excellent strain for canning, 60 days.

12.50

SWISS CHARD

1 oz. will plant 75 ft. row; 8 lbs per acre.

1 oz. ½ lb. 1 lb. 10 lbs.

Decidedly the best of the Chards. Leaves broad, upright in growth, very dark green, crumpled or savoyed with broad white mid-rib. 60 days.

Leaves are smooth, dark glossy green. Stems and midribs are white, very broad and comparatively thick. 60 days.

MANGEL WURZEL AND SUGAR BEETS

1 oz. will plant 75 ft. row; 6 lbs. per acre.

1 oz. $\frac{1}{4}$ lb. 1 lb. 5 lbs.

Long, reddish-yellow ovoid roots, growing half above ground. Flesh white, tinged yellow. 110 days.

Roots nearly cylinderical, light red, growing well above ground; flesh white and rose-colored. Enormous size. 110 days.

BROCCOLI

1 oz. will produce 1500 to 2000 plants.

1 oz. $\frac{1}{4}$ lb. 1 lb.

Italian Green Calbreese \$.50 \$1.50 \$5.00

Plant forms a large solid central head; when cut sprouts develop from the leaf axis. Each sprout terminates in smaller green heads which are bunched for market. First heads are marketable in 70 days after seeding. Transplanting delays cutting about one week.

Early spring, rapid growing annual producing a liberal cutting of leaves and tender flower shoots, used as greens. Shoots to seed rapidly and plants should be cut before they come into flower. Plant 12 to 15 inches high.

BRUSSEL SPROUTS

1 oz. will produce 1500 to 2000 plants

1 oz. \(\frac{1}{4}\) lb. \(1\) lb.

The best and most dependable variety. Plant early and compact, producing many solid, round sprouts of good quality. 90 days.

CABBAGE

1 oz. will produce 2000 plants. 1/4 lbs. per acre.

The days indicated are the average required to produce marketable heads from the date of setting young plants in the field. Allow from 30 to 35 days to grow plants.

YELLOWS RESISTANT VARIETIES

1 oz. 1/4 lb.	1 lb.
Wisconsin Copenhagen (New) \$1.00 \$3.00	
62 days. Heads 4 to 6 pounds, very compact, almost round, very uniform in maturity and size. Plants blue-green foliage, 10 to 12 inches tall, short stem.	Ψ10.00
Resistant Golden Acre	7.50
65 days. Produces small, erect compact plants of blue-green color. The globular, solid heads are about six inches in diameter. The earliest round-head yellows resistant variety.	
Racine Market	7.50
68 days. Plant compact, short stemmed, upright distinct blue-green leaves with erect growth. Round, solid heads, about 61/2 inches in diameter. A wellows resistant Early Copenhagen Market type.	
Marion Market	7.50
75 days. Plant medium stemmed with blue-green foliage. Heads 6 to 7 inches in diameter, round and firm. A yellows resistant Copenhagen Market, somewhat slower developing and larger headed. A heavy yielding second early variety for market or kraut.	
Improved Globe	7.50
80 days. A yellows resistant improved strain of Glory of Enkhuizen. Plant large, vigorous, medium green. Head 7 to 8 inches in diameter, compact and globular.	
Wisconsin All Seasons	7.50
90 days. A yellows resistant strain of All Seasons. Plant large, upright, with dark blue-green leaves. Head 10 to 12 inches across, 8 inches deep, weigh 9 to 10 pounds large and flat with a rounded top. Does not crack easily. Excellent for kraut.	
Wisconsin Hollander No. 8	7.50
100 days. Plant upright, blue-green leaves, a vigorous grower. Head 7 to 8 inches in diameter, 7 to 9 pounds, globular to flattened globe, very firm. Excellent quality and heavy yielder.	
Bugner	7.50
110 days. A vigorous growing late maturing variety yielding large tonnage per acre. Medium stemmed, large spreading plant with deep blue-green leaves. Head 8 inches in diameter, 8 to 10 pounds, deep globe and flattened on top.	
STANDARD EARLY VARIETIES	
1 oz. ½ lb.	1 lb.
Golden Acre	\$5.00
Early Jersey Wakefield	5.00
62 days. Plant small, compact with medium green leaves. Head conical, usually 7 inches deep, 5 inches near base, weigh 2 to 2 1/2 pounds, greenish white interior and fairly solid.	
Copenhagen Market	5.00
66 days. Plant erect, compact, short-stemmed few outer leaves, medium light green. Head uniformly round, solid, 6 to 7 inches in diameter, weighing 3 to 4 pounds.	-

CABBAGE

1 oz. will produce 2000 plants. 1/4 lbs. per acre.

INTERMEDIATE VARIETIES

INTERMEDIATE VARIETIES		
1 oz.	¼ lb.	1 lb.

Resistant Red Hollander	2.40	8.00
100 days. A yellows resistant red variety. Head purple inches in diameter, weighing 6 pounds, round to globe solid. Matures fast permitting early cutting.	e-red 7 shape,	

CABBAGE

1 oz. will produce 2000 plants. 1/4 lbs. per acre.

SAVOY CABBAGE

	1	oz.	¼ lb.	1 lb.
Chieftain				\$7.50
88 days. Plant medium size, short stemmed, compassively leaves. Head medium large, drumhead ty rounded on top, flat at base, firm and well folde time without bursting. Very uniform and the bestypes.	ype ed.	, thicl Stand	k, flat s long	

CHINESE OR CELERY CABBAGE

	1 oz.	$\frac{1}{4}$ lb.	1 lb.
Michihli—Improved Strain			\$5.00
70 days. The earliest and most sure heading varto 20 inches tall, 3 1/2 to 4 inches thick, taper very firm, well blanched, crisp, tender and sweet. Smarket garden strain.	ed at t	the tip,	

CARROT

1 oz. will plant 300 ft. row; 4 lbs. per acre.	
1 oz. ½ lb.	1 lb.
Chantenay, Long Type	\$2.00
Chantenay, Red Cored	2.00
Danvers Special Red Cored	2.00
Scarlet Nantes or Corless	2.00
Hutchinson	2.00
Imperator 77 days. Tops medium, abundant, strong enough for good bunching. Roots 8 inches long, 1 1/2 inches at the rounded shoulder, smooth, uniformly tapered to a semi-blunt end. Flesh rich orange color, extending to center of root, fine-grained, tender and excellent quality. Chiefly used for bunching.	2.00
Morses or California Bunching	2.00

CAULIFLOWER

1 oz. will produce 2000 plants. 1/4 lbs. per acre.

The number of days indicated are the average required to produce heads from the date the young plants are set in the field. Usually it is 30 to 35 days from the time seed is sown until the young plants are ready for the open field.

1 oz. 1 oz. 1 lb. 1 lb.

CELERY

1 oz. will produce 10000 plants; 1/4 lb. per acre.

The number of days given for maturity are those normally required from time of setting plants in the field to earliest harvesting.

YELLOW OR GOLDEN VARIETIES

l oz. 1 lb. 1 lb. Dreyer's Special \$2.00 \$5.50 \$20.00 About 10 days later than our Golden Prize, but has a very heavy rib which is a trifle shorter, and a large golden heart. This strain will produce 10 percent more cates per acre because of its heavy shoulder and compact stalk which is unsurpassed by any other Celery on the market. 85 days. Golden Prize 2.00 20.00 5.50 An improvement of the Golden Plume types. The plant has a long first joint, large heart, and is a fast grower making a very desirable strain for an extra early crop, either under glass or in the field. About an 80-day celery.. Golden Plume or Wonderful 1.25 3.50 12.00 Plants normally 24 to 26 inches tall with stems 71/2 to 81/2 inches long, fairly heavy, compact and full hearted. About 85 days. Cornell No. 19 2.00 20.00 Developed and introduced by the New York College of Agriculture. A cross between Golden Self-Blanching and Utah. Plants 24 to 25 inches tall, 10 1/2 to 11 first joint. Hearts long and comparativley full. Stems thick, rounded and smooth texture. Highly resistant to fusarium yellows. This variety should not be planted nor set in the field too early in the Spring as it appears to go to seed very readily if checked by Spring frost or cold weather. Also known as Yellow or Ivory Pascal. About 100 days. 5.50

CELERY

1 oz. will produce 10000 plants; 1/4 lb. per acre.

GREEN VARIETIES

1 lb. 1 lb. 1 oz. California Pascal \$2.00 \$5.50 \$20.00 An outstanding strain of green celery. Plants are 26 to 28 inches, medium dark green, erect and compact. Stems are 8 to 10 inches long, rounded, thick, waxy in appearance, blanches readily, tender, crisp and of excellent quality. 120 days. Pennsylvania Pascal 2.00 5.50 20.00 A most desirable green variety of excellent quality. Plants medium height, stocky and compact. Stems are very thick, solid and full rounded; blanches a yellowish-white with a pronounced glazed smooth surface, without stringy ridges; very brittle and of a fine nutty flavor. 120 days. Giant Pascal 10.00 1.00 3.00 A tall, late vigorous, green sort. Stalks round, thick and solid.

CELERIAC

Blanches yellowish-white, 140 days.

1 oz. will produce 5000 plants.

1 oz. $\frac{1}{4}$ lb. 1 lb.

Turnip-rooted celery. Roots 3 to 4 inches in diameter; globular; fairly smooth; stalks hollow and dark green.

COLLARDS

1 oz. will produce 2000 plants. 1/4 lbs. per acre.

1 oz. $\frac{1}{4}$ lb. 1 lb. 10 lbs.

A leafy, non-heading plant of the cabbage family grown for greens. Plant 2 to 3 ft. tall, erect and spreading, produces blue-green crumpled leaves under adverse conditions of heat and poor soil. 75 to 80 days.

CORN SALAD

1 oz. will plant 100 feet of drill.

1 oz. $\frac{1}{4}$ lb. 1 lb.

A thrifty, large growing sort producing rounded, thick, medium grey-green, tender leaves that grow in the form of a rosette. 45 days.

SWEET CORN

1 lb. will plant 150 hills. 12 to 15 lbs. per acre.

During the past few years, vast improvements have been made by many State Experiment Stations and Seed Breeders in the methods of developing sweet corn seed. Through the crossing of various inbreds to produce hybrids, and the top crossing of inbreds on open-pollinated stocks, there have been developed many new and improved strains which are more uniform in maturity and yield much heavier than standard sorts. These strains are highly resistant to bacterial wilt or Stewart's disease disease.

HYBRID VARIETIES	
1 lb. 10 lb.	
Marcross C 6-13	\$45.00
A first, good hybrid for early market. Stalks about 5 feet, sturdy and highly resistant to wilt. Ears 7 inches long, plump, abruptly tapered at tips; 10 to 14 rowed, with light cream-yellow, medium broad kernels of good quality. Matures in 72 days.	
Marcross P 39	45.00
A top cross on Golden Early Market; resistant to wilt. Ears are 6 to 7 inches long. 12 to 14 rowed, large yellow kernels. Stalks 5 to 6 feet high. Matures in 75 days.	
Carmel Cross	45.00
An early midseason type for market use. Ears 61/2 to 7 inches long, 10 to 14 rowed, golden yellow kernels. Quality better than Marcross C6-13, but not quite as good as Golden Cross Bantam. Plants 5 to 51/2 feet high, sturdy. Matures in 75 days.	
Spancross P 39	45.00
A top cross of Spanish Gold and inbred Purdue 39. Stalks 6 to 61/2 feet with well tipped ears of 10 to 12 rows, 61/2 to 71/2 inches long; kernels golden yellow, sweet, tender and of good quality. Highly resistant to wilt. Mature in 78 days.	
Lincoln	45.00
Develped by the Connecticut Agricultural Experiment Station. Vigorous well-foliage, 6 1/2 foot plants. Ears 7 1/2 inches long, 2 inches in diameter, 12 to 16 rows, tapered to tip, bright yellow broad, kernels of good quality. Matures in 82 days.	
Whipcross P 39	45.00
Stalk sturdy with strong foliage; highly resistant to Stewart's disease; ears 7 1/2 inches long, 12 to 14 rowed, well filled at tip; very prolific. Matures in about 84 days.	
Golden Cross Bantam	45.00
The ears are light yellow, 10 to 14 rowed, 71/2 to 8 inches long; they are very uniform and mature practically all at one time, in about 85 days. It yields very heavy and being a hybrid makes a heavy, uniform growth, large dark green leaves, with sturdy stalks, 6 feet in height. It is resistant to wilt and the tightly wrapped husks resist earworms. Matures in about 85 days.	
•	45.00
Plants 7 to 7 1/2 feet tall, wilt resistant and somewhat drought tolerant. Ears 7 to 7 1/2 inches long, slightly tapering, small deep kernels of fine eating quality. Matures in 85 days.	
loαna	45.00
Originated by Iowa State Colege. Highly resistant to wilt. Stalks 61/2 to 7 feet high, sturdy and dark green foliage. Ears 12 to 16 rowed, 8 inches long, cylindrical; well filled with mediumnarrow, light yellow kernels. Matures in 87 days,	
Bantam Evergreen Hybrid	45.00
A late, good yielding, yellow hybrid, Ears cylindrical 8 inches	20.00
long. 14 to 16 rowed. Kernels good yellow, medium wide and deep. Stalks 7 to 8 feet tall, upright, sturdy, uniform; leaves wide, dark green. Mature in 90 to 95 days.	
STANLEY'S CROW REPELLENT	
1/2 Pint (1 bus.)	.\$1.00
Quart (2 bus.)\$1.75	

CUCUMBER

1 oz. will plant 50 hills. 2 lbs. per acre.

	Tou, will plant oo little, w loss, per	acre,		
		l oz.	1 lb.	1 lb.
Ace	•••••	\$.30	\$.90	\$2.75
	Color deep green. Fruits uniform, nearly cylindrical, ed at the ends, 8 to 9 inches long, 2 to 2 1/2 inches tive in appearance and holds its color well. 65 days	slightly s thick.	taper-	,
Chic	ago Pickling	.25	.75	2.50
	Fruits medium green, nearly square ended; very worted and ribbed at pickle size. If fruit is left on velop to 61/2 inches long and 21/2 inches thick.	vines, v	vill de-	
Early	Fortune	.25	.75	2.50
	Fruits dark green, color retained a long time after 9 inches long, 21/2 inches thick, only slightly tap uniform. 66 days.	harves pered an	t, 8 to	
Hybi	rid	.25	.75	2.50
	An early variety. Fruits dark green with lighter strend, $81/2$ to 9 inches long; $21/2$ inches thick, Excellent pickling sort if picked when young. 62 days	fairly p	olossom orolific.	
Marl	reter	.30	.90	2.75
	An excellent market variety, unusually trim appear form. Fruits very dark green, cylindrical, slightly ends, 8 inches long 21/4 inches thick, Seed are small. Vines very vigorous and yields heavily througing season. 60 days.	tapered a except	at the ionally	
Strai	ght 8	.30	.90	2.75
	Fruits about 8 inches in length, 1 1/2 to 2 inches in formly cylindrical with rounded ends, deep green objectional light stripping or tipping. An attractidays.	diamete	e from	
	ENDIVE			
	1 oz. will plant 150 ft row. 4 to 5 lbs. p	er acre.		
		l oz.	1 lb.	1 lb.
Fall	Heart Batavian	\$ 20	\$.60	\$2.00
run	Also know as Escarolle. Plant medium large, very d growth, with a dense mass of thick, slightly constrongly bunched to give a well blanched heart. An ket garden strain. 71 days.	eep, of trumpled	ipright leaves	Ψ2.00
Gree	n Curled, Pink Rib	.20	.60	2.00
	A large late, vigorous sort. Plant medium green wit cut leaves. The crowded foliage, dense at the blanches itself. The mid-ribs or leaf stem is tinged whown as Chicory in local markets. 76 days.	center.	readily	
Gree	n Curled, White Rib	.20	.60	2.00

Plant large 18 inches in diameter, tuffy and full center. Leaves have deeply cut margins and curly. Mid rib is pale green, thick, tender and fleshly. Heart blanches well in late summer and fall.

76 days.

DILL

1 oz. will sow a 200 ft. row. 5 lbs. per acre.	
Long Island Mammoth	10 lbs. \$10.00
EGG PLANT	
1 oz. will produce 1000 plants. 1/2 lbs. per acre.	
Black Beauty Plants thrifty 24 to 28 inches tall, commonly bear 4 to 6 large fruits per plant. They are smooth, broad, egg-shaped, uniform, very rich dark purple, retaining color a long time. Matures	1 lb. \$9.00
Florida High Bush	9.00
FENNEL 1 oz. will plant 75 ft. row. 8 to 10 lbs. per acre.	
Florence (Finocchio) Plant 2 to 3 feet tall, with broad overlapping stalks similar to celery stalks but forming a flat-oval, bulb-like enlargement at the base of the stem.	1 lb. \$2.00
1 oz. will plant 500 ft. row. 1/4 lbs. per acre.	
Dwarf Curled Scotch \$.30 \$.85 Plant has wide-spreading, finely curled blue-green plume like leaves. Very hardy and uniform. Grown for use as greens. 55 days.	1 lb. \$3.00
KOHLRABI	
1 oz. will plant 200 ft. row. 4 lbs. per acre.	
Produces bulbs 21/2 inches in diameter 55 to 60 days after seed is sown out of doors. Plants small, leaves medium green. Bulbs flattened globe-shape, pale green, used when 2 to 21/2 inches in diameter, but grow much larger, interior white, mild, crisp and tender.	1 lb. \$3.00
LEEK	
1 oz. will plant 200 ft. row. 4 to 5 lbs. per acre.	
American Flag	1 lb. \$5.00
Musselburgh Long white stem with blue-green leaves longer than American	5.00

Long white stem with blue-green leaves, longer than American Flag. Can stand over winter when climate is not too severe. 150 days.

LETTUCE

1 oz. will sow 150 ft. row. 11/2 to 3 lbs. per acre.

ICEBERG HEADING VARIETIES

Developed by the U.S. Department of Agriculture and Cornell Experiment Station from same breeding material as Great Lakes. Frame and head slightly smaller than Great Lakes, solid, medium green, rather prominent ribs. Has proved a very sure header in the East. Particularly adapted for growing on muck soils. Resistant to tip-burn and early bolting. Used locally for field sowing and late transplanting. 82 days.

Developed from Imperial No. 152 for eastern conditions, Foliage dark green, head leaves long and well wrapped forming firm, slightly flattened heads, excellent quality, weighing 1 1/2 to 2 pounds. Somewhat resistant to tip burn and stands up well in hot weather. Very good for early transplanting. 80 days.

Imperial 847 (Black Seeded Iceberg)30 .85 3.00

Black seeded. Originally develped as a brown-blight-resistant variety for California, now popular in East and South as a market garden and shipping variety. Leaves smooth, thick, medium light green. Heads medium large, crisp, round, well-folded and firm. 83 days.

Developed at Pennsylvania Experiment Station from a cross of Great Lakes and Imperial 847. Head medium large and compact; outer leaves dark green, slightly crumpled, well folded, less finely cut edges than Great Lakes; comparatively free from objectionable ribbiness but equally solid and resistant to tip burn. Interior crisp and firm. Appears to be a very good variety for early and late spring planting. 83 days.

MUSTARD

1 oz. will plant 200 ft. row. 5 lbs. per acre.

1 lb. l oz. 1 lb. Fordhook Fancy \$.15 \$.35 \$1.00A handsome, upright growing, mild variety, bright green, plume-like, deeply fringed and cut on the edges. Grown for greens, 50 days. Southern Giant Curled14 1.00 .35 Very hardy and early; most popular for greens. Leaves large and wide, bright green and very curly on the edges. Plant although spreading, is quite up-right in growth. Does not bolt to seed as quickly as Fordhook Fancy. 40 days. ONION 1 oz. will plant 200 ft. row. 4 to 6 lbs. per acre. 1 lb. 10 lbs. 1 lb. l oz. Early Yellow Globe\$.40 \$1.25 \$4.00 \$37.50 A full globe shape onion of rich deep yellow color. Exceptionally good keeper which will hold up in storage better than most early sorts. Vigorous grower and heavy yielder and matures at least two weeks earlier than Southport Yellow Globe. Bulbs medium large, globe to flattened globe, skin tough, rich deep yellow; flesh firm and white. 98 days. Brigham Yellow Globe40 35.00 A selection of Southport Yellow Globe for thick skin and good keeping qualities. Does especially well on muck soil in the North. Excellent storage variety. Bulbs very solid, medium large, deep globe shape; skin dark orange yellow, thick and tough. Does not yield as heavily as Early Yellow Globe. 110 days. 33.00One of the most hardy and best keeping varieties, grown chiefly for sets. The matured bulbs are large, somewhat flattened, deep orange skin; flesh white of mild flavor. 100 days. Southport Red Globe 35.00 Standard late red variety; splendid keeper. Bulbs medium large, deep globe-shaped, small neck, thick skin, very deep purplish-red; flesh fine-grained, white with faint tinge of pink; flavor strong. 110 days. 1.50 5.00 47.50 Standard late white variety of highest quality. Bulbs medium large, globe shaped, firm; skin pure clear white; flesh clear white and fairly mild. Best keeper of the white onions. 110 days. Also used for green bunching during summer when small bulbs are desired. Sweet Spanish

Utah strain. The best of the very large, mild slicing varieties.
Bulbs large, deep-globe shape small neck; skin deep amber-orange; flesh white, fine-grained, mild flavored. Keeping quality fair. 115 50.00 40.00 4.50 42.50 Oriental or Evergreen White Bunching .45 The best straight or non-bulbing bunching onion. Produces a cluster of 4 to 6 marketable plants from a single seed in the first season. Therefore seed should not be sown too thick. Plants are ready for market in about 60 days; the silvery-white bottoms are often 6 inches long and 1/2 to 3/4 inches in diameter. Plants are hardy and can be wintered over.

PEPPER

1 oz. will produce 1500 plants. 1/2 lbs. per acre.

Maturity dates indicate approximate time required from setting plants into the field to the production of marketable green peppers. Allow 6 to 8 weeks to produce young plants.

1 oz. ½ lb.	1 lb.
Plant thrifty, upright, heavily productive over a long season. Fruits very large, smooth and regular; commonly 41/2 in. long and 31/2 to 4 in. through; deep green, turning bright crimson; flesh extremely thick and firm, sweet flavor. 75 days.	\$8.00
An outstanding pepper developed from California Wonder, a week earlier and better yielder. The fruits are deep glossy green turning bright crimson, slightly smaller but blockier and more symmetrical, with thick firm walls and high quality of California Wonder. The plants are more compact and not as tall as the parent strain but much heavier yielder, 63 days.	8.00
Early Giant (Harris)	8.00
For use in pickles. Plant vigorous, upright and prolific. Fruits round, about one inch in diameter, smooth, solid, very pungent or hot; color deep green changing to deep scarlet. 82 days.	7.00
Long Red Cayenne	7.00
Sunnybrook or Cheese	7.00
Worldbeater, No. 13 Mosaic Resistant	7.00

PUMPKIN

1 oz. will plant 25 hills, 3 to 4 lbs. per acre,	
1 oz. $\frac{1}{4}$ lb.	1 lb.
Connecticut Field	\$1.50
Standard field pumpkin for pies, canning and stock feed. Fruits very large, commonly 10 inches long. 12 inches in diameter, weighing 20 pounds, sometimes much larger; skin smooth, deep orange-yellow; shell thin, hard; flesh thick, coarse, sweet and deep yellow. Also known as "Jack O'Lantern' pumpkin. 120 days.	
Large Cheese	1.50
Our stock is uniform, true to type, dependably early and heavily productive. Fruits large, flattened, commonly 12 to 15 inches in diameter and half as deep; sometimes much larger, furrowed; skin creamy buff; flesh extremely thick, deep salmon-yellow and of good quality. 120 days.	
Small Sugar	1.50
Earliest and best for pies. Fruits commonly 6 inches long, 8 to 9 inches diameter; flattened, furrowed, skin smooth, rich reddishorange; rind hard; flesh thick, orange-yellow of unexcelled quality. 115 days.	

RADISH

2 oz. will plant 100 ft. row. 8 to 10 lbs. per acre.

1 oz. $\frac{1}{4}$ lb. 1 lb. 10 lbs.

An excellent market garden strain for early spring or late fall planting. During the warm summer produces too long tops. Roots olive-shaped, skin rich bright scarlet; flesh white, crisp and of splendid quality. 23 days.

A highly colored and very attractive radish bred for greenhouse torcing, growing on muck soil or high ground during the summer. Tops are grey-green and small; roots oblong-globe, slightly longer than broad, very firm and of bright almost true scarlet color. Very popular with market gardeners. 21 days.

The best early white variety. Tops medium short. Roots $4\,1/2$ to $5\,1/2$ inches long, slender, tapering at the tips, very white; flesh clear white, brittle, and of mild flavor. 30 days.

Roots commonly 5 inches long, 11/2 to 2 inches diameter at the shoulder, tapered, smooth and white; flesh firm, crisp and mildly pungent. 40 days.

Splendid keeper. Roots globular with slender tap roots; 31/2 to 4 inches in diameter; skin somewhat roughened, black; flesh white, firm, crisp and pungent. 55 days.

koots 8 to 9 inches long 21/2 inches in diameter at the shoulder, cylindrical, slightly tapered at tip; skin black; flesh white, solid and pungent. 55 days.

Price per 100 lbs. on application.

RUTABAGA or SWEDE

1 oz. will plant 100 ft. row. 3 lbs. per acre.

1 oz. ½ lb. 1 lb.

Improved American Purple Top \$.15 \$.35 \$1.00

Tops large, vigorous, blue-green. Roots 5 to 6 inches diameter, spherical, skin deep purplish-red above ground, light yellow below; tap root small; flesh yellow fine-grained, firm, crisp, mild and sweet. Often grown locally for tops as greens. 90 days.

SALSIFY or OYSTER PLANT

1 oz. will plant 100 ft. row. 8 to 10 lbs. per acre.

1 oz. ½ lb. 1 lb.

Mammoth Sandwich Island \$.40 \$1.25 \$4.00

A hardy slow growing species; requires all season and is better if frosted. Roots 8 to 9 inches long, 1 to $1\,1/2$ inches thick, tapering gradually. Top heavy and grass-like.

35.00

35.00

SORREL

1 oz. will sow 150 ft. row. 5 to 8 lbs. per acre.

l oz. 1 lb. 1 lb.

Narrow Leaved — (Special Strain) \$.80 \$2.25 \$8.00

Used in salads and as greens. Sometimes called "Sour Grass" because of its acid taste, Plant perennial, with long, slender, thick, bright green upright leaves with mildly acid flavor. 60 days.

Spinach

1 oz. will plant 100 ft. row. 10 to 12 lbs. per acre.

1 lb. 10 lb. 100 lb. Bloomsdale Savoy, Dark Green \$.50 \$4.00 \$35.00 Plant very early, hardy, vigorous and rapid growing; has tendency to go quickly to seed in hot weather; leaves medium large, distinctly blistered, "savoyed" and crumpled; thick in texture; rich, deep, medium-dark, glossy, green. For late fall or early spring sowing. 40 days. 35.00

.50 Long Standing Savoy 4.00About 3 to 5 days later than Bloomsdale, but will stand two weeks longer before bolting to seed. Plants very uniform; leaves medium large, intensely blistered or savoyed and crumpled, very thick in texture and rich, deep, dark glossy green. An excellent all season spinach. 45 days.

New Summer Long Standing Savoy 35.00 .50 4.00 A new and improved strain of Long Standing Savoy, distinguished for its darker Green Color. It will stand 3 to 4 days longer without bolting to seed and is remarkably uniform, with a trifle more curl than the parent. 45 days.

Virginia Blight Resistant Savoy50 Developed at the Virginia Experiment Station. The fastest growing of the savoy types of spinach; very smillar to Bloomsdale Savoy; should only be used for late fall in our section as it is the quickest bolting of all savoy types in warm weather. 40 days.

Old Dominion 35.00 4.00 .50 A cross of Virginia Blight Resistant Savoy and King of Denmark. Large, dark green, heavily crumpled leaves somewhat pointed. Resistant to mosaic and stands fairly well without bolting; tolerant to cold soil. Used for early fall crop, also late fall sowing for early spring harvest or wintering over. 40 days.

King of Denmark50 4.00 Medium early; remarkably long standing and heat resistant sort. Plant hardy, vigorous and rapid in growth; leaves large, long, moderately broad and tapered, thick and firm texture; dark dull green in color; slightly crumpled and blistered. A fine summer spinach. 48 days.

Haarlem Market (Prickly Seeded Savoy) 40.00 .60 4.50 This variety is earlier, quicker growing and hardier than Bloomsdale Savoy as well as being remarkably resistant to blight. Being hardier than round seeded spinaches, it will stand cold and unfavorable weather.

Spinach Seed Treatment

Growers often have difficulty in securing a good stand of spinach. This is often caused by damping-off of the young plants and may be controlled by treating the seed with Arasan Dust before planting. Use this dust at the rate 4 oz. to 100 pounds of

However this treatment will not prevent young spinach plants from burning off during the hot summer months.

SQUASH

SUMMER VARIETIES

3 oz. will plant 100 hills. 3 to 4 lbs. per acre.

1 oz. $\frac{1}{4}$ lb. 1 lb. 10 lbs.

Cocozelle, Italian Vegetable Marrow \$.20 \$.50 \$1.60	\$15.00
Fruits straight, almost cylindrical, 16 to 18 inches long and 6 inches diameter at maturity; usually picked for market when 6	
to 8 inches long. Color dark green with lighter green stripes;	
flesh pale greenish white, prolific, early and excellent quality. 60 days to maturity.	
Early Prolific Straightneck (Bush)20 .45 1.50	14.00
A high yielding squash of the Summer Straightneck type. It is earlier and uniformly productive over a long period of time. The	
fruits are firm and marketable when only 4 or 5 inches long and	
are excellent when they attain their full length of 12 to 14 inches. They are straight, smooth and delicate creamy yellow in color,	
have no trace of green when very young. 50 days to maturity.	
Giant Summer Straigtneck (Bush) 20 .45 1.50	14.00
A selection from Crookneck with a straight neck, being more easily packed for shipment. Fruit intensely warted, 18 to 20 inches	
long, deep orange in color with a thick, meaty neck. 60 days to maturity.	
White Bush Scallop (Bush)	14.00
Very early; fruit flattened and scalloped, about 8 inches in dia-	
meter. Comparatively smooth on the surface and creamy-white in color. 68 days to maturity.	
Zucchini (Bush)	15.00
Straight, almost cylindrical, 18 inches long, 4 inches diameter, medium green with grayish-green mottling. In best edible condi-	
tion when 6 to 8 inches long. 65 days to maturity.	
FALL OR WINTER VARIETIES	
3 oz. will plant 100 hills. 2 to 3 lbs. per acre.

TOMATO

The number of days indicated represents the time required from setting of plants to produce marketable fruits.

1 oz. will produce 1500 plants. 1/4 lb. per acre.

l oz. $\frac{1}{4}$ lb. 1 lb. Master Marglobe (N. I. State Certified) \$.65 \$2.00 \$6.50 By far the most popular tomato. Plants are strong, robust, with heavy foliage, resistant to Fusarium wilt and nail-head rust, moderately productive. Fruits are deep red, medium large, nearly globular, smooth, solid and with thick walls and cross-sections, making small seed cells. 75 days. Rutgers (N. J. State Certified) 6.50 .65 2.00Developed by L. G. Schermerhorm of the New Jersey Agricultural Experiment Station, by selection from a cross between Marglobe and J. T. D. The plants are large with thick stems and abundance of vigorous foliage, which protects the fruits from sunscald. The fruits are medium large, similar in shape to Marglobe, but more flattened at the stem. The outer and inner walls are thick with very small seed cavities. Flesh is firm and red throughout. Excellent for green-wrap. 73 days. Pritchard or Scarlet Topper 1.75 6.00 .60 Fruits good size, round, brilliant red in color; thick flesh, firm and with small seed cavities. They color perfectly right up to the top without any green spots and have little tendency to crack. 75 days. 10.00 Valiant 1.00 3.00 Introduced by Francis C. Stokes Company in 1936. Fruits extra early, large, solid, globe-shaped and of bright scarlet color. Vine upright to partly spreading and dark green, 70 days. Valiant (Special Stock Seed) Plant and fruit same as above but seed is from special stock of mother seed. Stokesdale 2.006.50 An early variety of Marglobe type, but slightly heavier and maturing a week to ten days earlier. Fruits riben from the inside out, like Rutgers: quite free from cracking and a remarkably heavy yielder. 73 days. 9.00 2.50 Dwarf Champion90 A strictly dwarf variety, useful in home gardens where space is limited. Produces excellent plants which are short, heavy, compact, stocky with dark green foliage. Fruits medium size, pinkish purple in color, flattened globe, smooth and solid. Not a commercial variety. 83 days. 7.50 .75 2.25 Garden State Developed by Campbell Soup Company from crosses involving Pritchard, Marvel and Pink Topper. Plant vigorous, partially resistant to Fusarium Wilt and late blight; frutis slightly flattened globe-shape, attractive in color and size and thick-walled. 84 days. 15.00 1.50 4.50 Italian Red Plum (Special Strain) Fruits oval 21-2 inches long by 11-2 inches in diameter, borne in clusters, elongated, flat-sided, blunt blossom end, two celled, deep red; flesh thick, contains little or no juice, flavor very mild. Plants medium, rather open and very prolific. Used for canning solid pack, tomato paste and puree. 70 days.
